## **DETAILED ACTION**

### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mark J. Gallagher on 12/27/2005.

The application has been amended as follows:

In claim 42, insert -- said film exhibit multi-temporal relaxation, -- between "absorber mirror" and "wherein".

In claim 65, at the end (just prior to the period) insert -- ,and said film exhibits multi-temporal relaxation. --

Cancel claim 95, and

In claim 97, insert --65 -- between "claim" and "wherein".

### ***Allowable Subject Matter***

Claims 35 – 49 and 65 – 112 are allowed.

The following is an examiner's statement of reasons for allowance: Claims 35, 42, 43, 49, 65, and 103 recites an apparatus and method of saturable absorber for passive modelocking of laser structure including the specific structure limitation of *film exhibit, multi-temporal relaxation*, which is neither anticipated or disclosed nor suggested in any piece of available prior art, which is neither anticipated nor obvious over the prior art of record.

Claims 48 and 108 recites an apparatus and method of saturable absorber mirror for passive modelocking of laser structure including the specific structure limitation of *high energy ion creating a first trap concentration at a first depth region and a second trap concentration at a second depth region such that said film exhibits saturable absorption governed by a fast time constant and a slow time constant*, which is neither anticipated or disclosed nor suggested in any piece of available prior art, which is neither anticipated nor obvious over the prior art of record.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Lin et al (5,436,925) discloses a by controlling the dosage and energy of ion implantation, the carrier lifetime can be reduce to the value required, but don't show or teach or disclose the film exhibits multi-temporal relaxation.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
